

Seminar "*Bioenergy – from Research to Market Deployment in a European Context*",
14th June 2017, Stockholm

On 14th June the Consortia of Biomass Sustaining the Future (BESTF3), ERA-Net Bioenergy, together with the European Technology and Innovation Platform (ETIP) Bioenergy are proud to announce the seminar entitled "*Bioenergy – from Research to Market Deployment in a European Context*". The Seminar is organised as a side-event in conjunction with the European Biomass Conference & Exhibition (EUBCE) in Stockholm; <http://www.eubce.com> and will start at 8.30 in the morning and finish around 15.30.

The Seminar "*Bioenergy – from Research to Market Deployment in a European context*" will bring together selected key members from the bioenergy sector to discuss some of the latest bioenergy research results and current challenges in this field. The morning will focus on the research side and Project Coordinators of projects funded via ERA-Net Bioenergy and Biomass Sustaining the Future (BESTF) will present remarkable results of their past three years of research. The afternoon session will focus on strengthening the market uptake of advanced biofuels and bioenergy and will finish with a lively discussion on how to bridge the gap between research and demonstration and industry, and which R&D priorities to focus on. The panel will include representatives from the European Energy Research Alliance (EERA) – Bioenergy Joint Programme, the Renewable Heating and Cooling Technology Platform (RHC) and ETIP Bioenergy. Lunch will be provided and there will be ample time for networking.

Those wishing to participate will be treated on a first come first-served basis. The room is large enough to accommodate 80 persons in total. It is important that you inform us whether you have a ticket for the EUBCE and therefore do not require a special ticket for attending the seminar on June 14th. If you only plan to participate in our side event and not the rest of the EUBCE, we will need to know this as you will receive a special code for registering on the conference site.

Don't miss this opportunity to learn more about the latest bioenergy research developments from experts in the field in Europe and to participate in a unique interactive discussion on how to drive this research forward to the market. We would be grateful if you would please confirm your interest in attending and confirm whether you need an entrance ticket for the Seminar on 14th June by 1st May 2017 at the latest by filling in the form in the link below
